

## Quality Handbook Statement

---

The AEC has designed and implemented a number of Quality Assurance policies to develop and protect the academic integrity of all our programs. The implementation of this Handbook will ensure the college is able to evaluate and enhance its programs to reflect the needs of industry and society. The work of the Quality Assurance Department is intertwined with the academic and non-academic developments of the college. The established processes enable the college to understand where we are and where our stakeholders want us to be. Our approach to Quality Assurance is underpinned by the college's overall vision for education which focuses on achievable and actionable results that focus on continuous improvement. Through our Quality Handbook we are able to systematically document our quality approach that reports information that informs the college's decision-making process.

The AEC Quality Handbook will:

- Defend the academic standards and integrity of the college
- Guarantee excellence in teaching and learning and the development of positive learning experiences
- Support continuous, reflective and systematic development actions at the AEC
